

Hello sir, how are you doing during this pandemic? How the education system has changed during this covid-19?

I am good, and talking about changes during the covid-19 era, the whole system went online and schools got closed.

Sir, what do you mean by the system got changed. What do you think which is better online or offline???

Meaning of not really a experience is that ,the experience with students during offline classes was better and interesting rather than online class. In my opinion offline is the best.

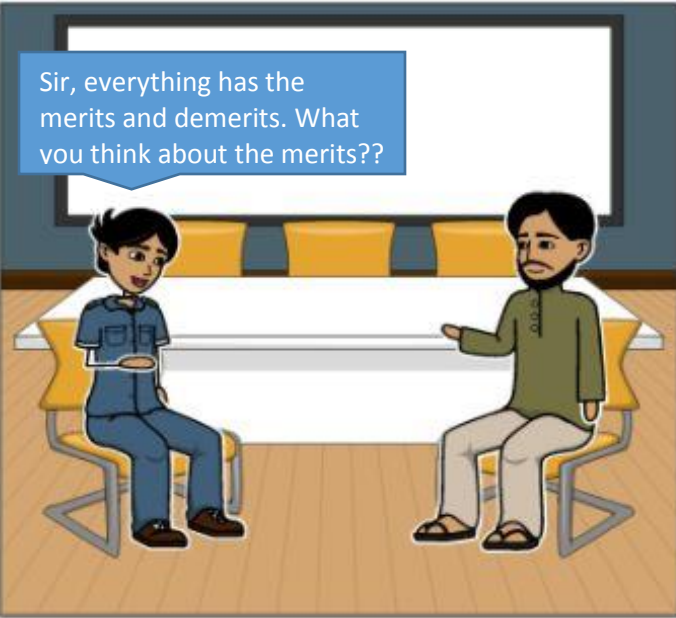

Sir, what were the difficulties that you have faced during online classes??

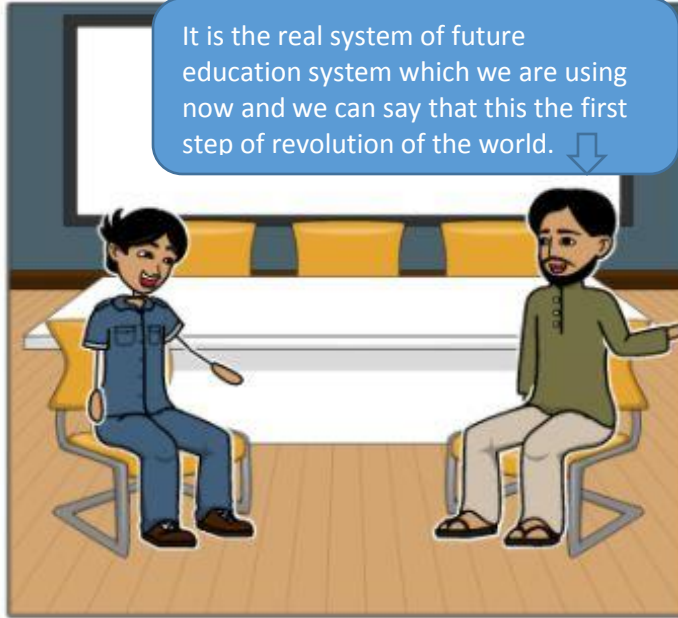

Most important one is the network issues faced by the students and teachers and 90% times the student are unable to join class in single attempt. And most the times the teacher has to cancel the class due to the same

Sir, everything has the merits and demerits. What you think about the merits??

It is the real system of future education system which we are using now and we can say that this the first step of revolution of the world. ↓

Nice talking to you sir. It is the time we will find positivity everywhere.

Have a good day sir
